Age Range: 4 - 8 years

Grade Level: Preschool - 2

Customer Reviews

My 3 1/2 year old daughter loves to find the hidden numbers in each picture. She wants to read this book over and over. We first found it at our library. When it was time to return it she asked if we could "own' it. I knew it was a winner!

I know my nieces and nephews will enjoy looking at this book. They love gardening and the bright illustrations will hold their attention. Counting the pieces of vegetables is a clever way to learn their numbers.

I purchased this book as part of a grant on gardening. I wanted to add literacy to the process of raising our own vegetables. It is a great counting book as well and at the end they put a salad together....something children don't always like.

This is a cute book and I am happy with it. Wish it had more pictures of actual gardens. Looking for one that shows kids watering and planting seeds. Not bad for the price.

As a Father, I immediately like this book Growing food used to be a large part of human knowledge, I feel a responsibility to show that to my son, they have to start at very young age to love the nature. Our yard has lots of things to explore so many times we would just walk around our own backyard together.
