Play Basketball Like A Pro: Key Skills And Tips (Play Like The Pros (Sports Illustrated For Kids))

Synopsis

Big slam dunks are just one part of basketball. Pro players practice hard to learn skills that help their teams on the court, such as shooting three-pointers, stealing the ball, and making rebounds. Practice the tips inside to play basketball like a pro!

Grade Level: 3 - 4

Customer Reviews

I bought this book for my 11 year old son who is just getting interested in boy's league basketball. It is short and to-the-point, and written in a magazine format with much of the text attached to photos. It gives lots of info on fundamentals that new players need to know. As a bonus, it is worth 0.5 AR points at my son's school.

I always buy books as graduation gifts to my kids for finishing whatever grade they r in. I bought this for my 7 yr old son who just finished 1st grade. He loves basketball n will be doing a bulls camp this summer. He loved it!

My 7 year old grandson really enjoyed this little gift. This is his second season on a basketball team and he loves reading everything about the game. Good tips, an easy read for kids, and an assortment of pics of pro players.

Bought this for my 8 year old for Christmas. He enjoyed reading it at bedtime although I'm not sure how much of the tips/training he actually applied to his basketball game. He seems to do better at the electronic version.

I bought this for my eight year old son who loves sports, specially basketball. The pictures in this book are very bright and colorful, and the information about the players are very good. My son loves it and learned a lot from it. I'll recommend this to anyone who has an eight year old that loves basketball. My son has truly learned a few techniques from this book.

Excellent, concise training information. This book shows how to improve your game using individual skills. Written for a 12+ year old.

My 9 year old basketball loving son loved this book, I was slightly disappointed. It was shorter and less wordy than I would have hoped. He started using some of the tips right away, which was neat to see.

My grandson said that he liked the book. It should complement his coaching and training. The graphics are appropriate for kids.
