African Plains Coloring Book (Dover Nature Coloring Book)

Synopsis

This exciting coloring book, documenting the flora and fauna of the African plains, will thrill colorists and nature lovers alike. Forty-one realistic scenes (including four double-page spreads), meticulously researched and accurately rendered by artist Dianne Gaspas-Ettl, depict a variety of wild animals in their natural habitats. Included are ready-to-color illustrations of a magnificent giraffe at a water hole, a matriarch and herd of African elephants, a cheetah with its young on an abandoned termite mound, a yellow-winged bat amid the blossoms of the baobab tree, village weaverbirds' nests hanging from umbrella acacia, and much more. Descriptive captions accompany each illustration, identifying subjects by common and Latin names and briefly describing the environment.

Age Range: 6 - 11 years

Grade Level: 1 - 5

Customer Reviews

I love Dover Coloring Books. All of the pages are drawn very well and they are fun to color. I love the crisp white pages. This one has a bunch of good animals to color. Here are some pages from the book and one that I colored. It is a great coloring book for adults or children.

This is not your typical disney coloring book, its a very realistic collection of detailed images that can

be colored depicting wildlife in africa. The images are a reminder of things one may see when watching discovery channel. Although this book is a coloring book im going to use it for scrollsawing images due to its great detail. Take coloring to a higher level with this book using crayons or pencil colors or try to redraw the images on a piece of paper. I give it 5 stars because all the unique things i felt an intrest of doing with this book. It would be great for teachers in elementary school. or just fun to use.

My grandson wanted coloring pages that were of very realistic, "not common" wild life. The was excited when he saw it. The pages are very detailed and requires fine motor skills, but at age 6 he was able to color them using sharp colored pencils.

Though a relatively new publication (to a company that's been leading family-oriented East African Expeditions for nearly a decade), we'd highly recommend this book for young travelers! Since coming across it in the last couple years, we've begun including this book as part of our predeparture preparation. Enjoy the book!

We are a homeschooling family and these books open a world of questions and research- and are great to help develop fine motor skills.

This is a beautiful coloring book for kids... Very impressive graphics and variety of images to color... good value and quality paper.

Fantastic. These books are the best I have found to find pictures to use as templets or stencils for designs to paint on silk.

Very excited to get this book. The animals are very detailed and beautiful. I love to color this book. One of my first trys at coloring for senior adults.
